

New Consciousness and the Evolution of Humanity

Humanity stands on the edge of a New Consciousness... a different way of experiencing who we are and how we fit into the universe. Nothing need change in the outside world for this to happen... only how we view ourselves must change. It will be as big a step as when animal mind evolved into human mind or we realized the sun didn't revolve around Earth.

Religion and Science will agree on a singular energy/being existing throughout the universe from the very beginning. Faith in God will be validated. The existence of Dark Energy will be proved.

Astronomers will be able to enter and study black holes... quantum physicists explain the wave/particle paradox and exceed the speed of light... anthropologists experience evolution from creation onward.

New Consciousness will change what we mean when we say "I am...". We will know we are not our body, nor even our ideas, thoughts, or emotions, but the universal "I" we each experience at our very core.

We will use our individual skills, talents, and abilities not just for our own personal enrichment but for the ultimate good of all. And when enough of us realize and live New Consciousness it will usher in an era of peace and understanding on Earth.

But here's the catch... This next step is voluntary. If humanity chooses not to evolve... or is not aware New Consciousness even exists... we will destroy ourselves, everything on the planet, and Earth will become just another black hole in the universe.

* * *

I am a phenomenologist with forty years of focused study in experiential consciousness. I have used my given talents and skills, knowledge and experience, to develop a curriculum of stories and games of New Consciousness so others can easily experience what it took me half a lifetime to know. That work and much more is already done. But it is meaningless unless it is known by others, and making that happen is not part of my skill set.

I must pass the baton of New Consciousness on to those who not only understand the big picture, but whose talents and skills, knowledge and experience, can share it with the world. This is how it works in New Consciousness... we each do our part with what we do best and the whole is greater than the sum of the parts. If we do it right, we will change life on Earth.

peace.....ag
